It was named in honor of the Roman emperor Augustus Caesar. |                                                                      |  <p>Birthstone: The modern August birthstone, peridot has been prized as a jewelry stone since ancient times. Always green in color but with considerable variations, a peridot's particular shade depends on its source.</p> |                                                                                     |                                                                                                                            |
